

First you will need the fill bucket and fill the background with black. Then draw three circles. The base is the biggest and the middle normal and the top one small. Then you need to go get a black marker and draw two black dots on the top separate from each other. Then draw black dots going like a "U" and then draw a hat like Abe Lincoln's hat on the top circle. Then draw two sticks and attach them to the middle section. And that is how you make a snowman.
